EDUCATION

Bachelor of Science in Computer Science, 2026
Southern New Hampshire University

WORK EXPERIENCE

Miss Excel, Scottsdale, AZ

Director of IT

June 2023 – Present

- Lead IT strategy, systems administration, and technical operations for a digital education company serving tens of thousands of customers and hundreds of corporate clients.
- Manage the company's technology ecosystem across online course platforms, CRM and customer systems, payment tools, webinar technology, internal software, user access, and third-party SaaS applications.
- Troubleshoot technical issues across internal operations, customer-facing platforms, integrations, and automations, while overseeing cybersecurity, system access, data protection, and business continuity.
- Partner with leadership and cross-functional teams to evaluate new technology, manage vendors, streamline workflows, and improve scalability through systems integration and automation.

Golub Management Corporation, Hicksville, NY

IT Support and Operations Lead

January 2021 – June 2023

- Led day-to-day IT support operations at a sales training organization, troubleshooting hardware, software, network connectivity, account access, and business application issues.
- Installed, configured, maintained, and upgraded workstations, operating systems, software, peripherals, and network-connected devices.
- Managed user access and technical documentation while coordinating technology deployments, maintenance, and employee support.

Retail Site Selectors Inc., Plainview, NY

Technology Supervisor

August 2016 – January 2021

- Transitioned into a technology-focused leadership role, overseeing computer systems, business applications, network resources, and day-to-day technical support.
- Troubleshot hardware, software, and connectivity issues while managing equipment, technology resources, and technical documentation.
- Evaluated and implemented technology solutions to improve business processes, workflow efficiency, and employee productivity.

Associate

June 2014 – August 2016

- Supported commercial real estate site-selection activities while taking on increasing responsibility for technology, digital resources, data organization, and technical troubleshooting.

Intern

June 2013 – June 2014

- Assisted with commercial real estate research, site-selection documentation, demographic information, property records, and general office operations.
